Date: July 2010 - August 2012

Total Project Cost: \$1.4 Million

Project Description:
Hazardous materials abatement and selective demolition of 3 school buildings including the surgical demolition of the gym, pool and cafeteria in the High School structure.

Project Name: Elmira Armory Demolition Project**Project Location:** Elmira, Chemung County, NY.**Date:** Project was completed in December of 2010**Total Project Cost:** \$1,144,000.00**Project Description:**

The National Guard of the State of New York Armory located in Elmira, New York was composed of 2 buildings built in the 1880s. The Armory is owned by the City of Elmira and was used as an annex to City Hall until the facade collapsed on March 10, 2006. City Hall and the Armory building were conjoined. The mechanicals extended from one building into the other, so the Armory couldn't just be lopped off. The stairwell that connects the two buildings will have to be re-enclosed on the Armory side when it's done.

In addition, Epic assisted the owner with identifying and removing various asbestos containing materials that were not identified by previous surveys and reports allowing the demolition of a clean building.

The demolition of the structure was performed using a JD 270 hydraulic track excavator equipped with a third member long stick and hydraulic thumb. A second hydraulic excavator, Epic's Hitachi 300, was utilized to manually move materials and assist in the demolition and staging of materials. The long reach equipment allowed Epic personnel to safely pull the demolished structure away from the adjacent buildings and street scheduled to remain. Various materials were also salvaged during the demolition process, including architectural stones, bricks and the flagpole.

Upon completion of remedial activities and the demolition of buildings, Epic performed various site restoration services including the restoration of exterior brick walls where surgical demolition occurred at the remaining stairwell structure.

Project Name: Laundry and Bakery Building Demolition**Project Location:** SUNY (College) at Buffalo, Buffalo, NY.**Date:** April 2010- October 2010**Total Project Cost:** \$1,849,000.00**Project Description:**

Hazardous materials abatement and demolition of two post World War II buildings to make way for the Colleges new science building. This project required the re-routing of the campuses underground utilities including the construction of a new steam tunnel.

Project Name: Pembroke CSD Abatement & Selective Demolition Project

Project Location: Corfu, NY

Date: June 2009 - Septmeber 2010

Total Project Cost: \$1,300,000.00

Project Description:

Hazardous materials abatement and selective demolition of all three district Schools. This project required all three schools to be performed simultaneous.

Project Name: Churchville-Chili CSD Abatement & General Construction Project

Project Location: Chili, NY

Date: Project Completed September 2009

Total Project Cost: \$680,000.00

Project Description:

Hazardous materials abatement and miscellaneous renovation/construction work of the district's High School.

Project Name: Buffalo State Campus Wide Fire Alarm Upgrade

NY State University Construction Fund

Project Location: Buffalo State University – Buffalo, NY

Date: Completed July 2007

Total Project Cost: \$853,000.00

Project Description:

Hazardous materials abatement and selective demolition of various University buildings undergoing an alarm upgrade.

Project Name: 500 Main Street Remediation Project

Various Demolition Projects throughout the City of Buffalo

Project Location: Buffalo, Erie County, NY.

Date: Various abatement and demolition projects beginning in September of 2004.

Total Project Cost: Over \$1 Million, cumulative

Project Description:

Asbestos abatement and demolition of various houses and commercial buildings including the surgical demolition of a 3-story masonry structure. Projects often include the salvage of historical architectural elements. The 500 Main Street project required Epic to install shoring and bracing needed to protect the historical portions of the building to remain (the entire front façade). Epic completed the project ahead of schedule and within budget.
